

Description

The Sava adapto is the perfect year round tyre for cost conscious drivers. Find your nearest Sava adapto dealer here.

Benefits

All weather grip

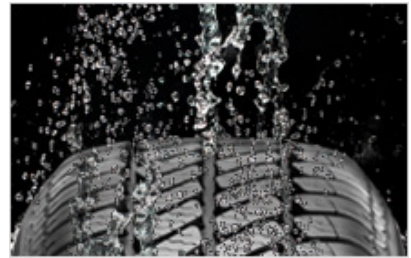

The Sava adapto features a special silica compound for year round grip – whatever the weather. The snowflake symbol indicates that it meets the strict standards demanded of a winter classified tyre.

Great handling and braking year round

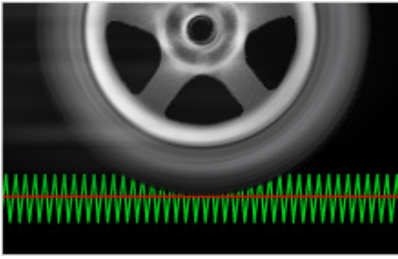

The tread compound adapts to the weather, giving the right level of stiffness in summer while staying flexible in winter. The result is dependable handling and braking in all weather conditions. Gripping edges in the tread add extra traction for winter roads.

Resistance to aquaplaning

Drive with confidence on wet roads. Wide tread grooves disperse water easily, reducing the risk of aquaplaning.

Quiet and comfortable

Quieter tyres mean a more comfortable ride and less noise pollution. For the adapto, we've designed a tread pattern that controls noise levels and gives you a smoother ride.
