

Description

The EcoControl tire is a fuel-saving summer tire that also gives you high mileage and excellent grip. Find your nearest EcoControl dealer here.

Benefits

Lower fuel costs

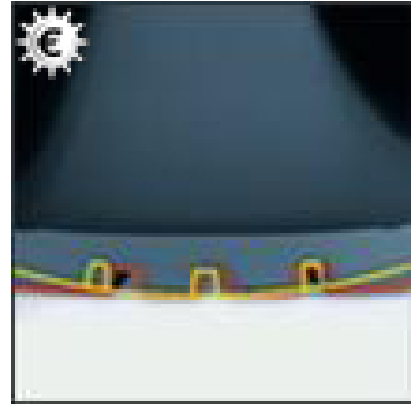

Save money with every journey. The Fulda EcoControl uses an innovative silica compound that reduces the tyre's rolling resistance – lowering your car's fuel consumption and CO2 emissions.

Drive with peace of mind

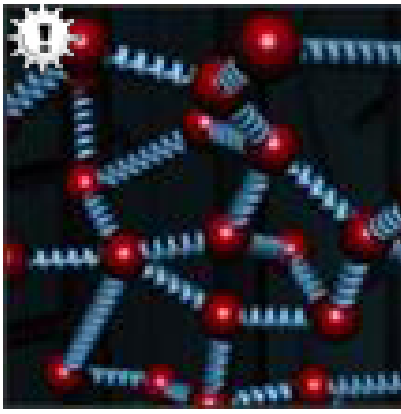

Enjoy a quieter, more comfortable drive. The EcoControl's optimised block arrangement reduces noise emissions.

High mileage

The EcoControl wears evenly over time, thanks to a flatter contour and increased tread width. As a result it lasts for longer, giving you more mileage between tyre changes.

Better braking in the wet

The special silica compound is optimised for high levels of wet grip, which means shorter braking distances in rainy weather. With an asymmetric design that maximises road contact, you'll experience reliable performance on dry roads too.
