

Description

A tyre designed to last, with outstanding durability and handling.

The Goodyear EfficientGrip Compact is a long-lasting tyre with excellent fuel efficiency, wet weather braking and aquaplaning resistance.

Benefits

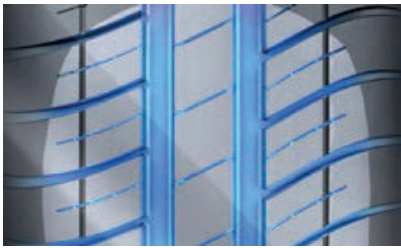

Better fuel efficiency and value By improving manufacturing materials and techniques, Goodyear have shaved 5%* off the tyre's weight. This reduces rolling resistance, so you'll save on fuel and enjoy better mileage. Improved pressure distribution across the tyre means you'll also benefit from more even wear across the treads.

Environmentally friendly A lower rolling resistance also makes the tyre more eco-friendly, as its lower fuel consumption means less CO2 emissions. Because it wears evenly, the tyre will also need to be replaced less frequently, which helps reduce waste.

Improved braking in all conditions Extra wide grooves and plenty of sharp biting edges for slicing through surface water feature on the EfficientGrip Compact's new tread design, to deliver shorter braking distances in both rainy and dry weather.

Aquaplaning resistance Feel safe on the road in all weathers with tyres designed to reduce aquaplaning. Rounder cavity shapes prevent water from building up in front of the tyre, to reduce the risk of aquaplaning.
